## About US: Pm4hire.com

*Pm4hire.com is a boutique project management services, consulting, and training provider. We follow PMI™/PMBok™ standards of excellence, using custom tools and techniques for effective project management. Project management is our passion: we focus on facilitation, streamlining, and communications to keep a project on track.*

### **We practice what we teach.**

Our experience makes your project successful.

We do not just manage projects, we also share our experience with your staff to prepare them for the next project(s) where they may be able to apply these skills on their own.

Check our website:

We offer detailed information on each of these areas of service. We also provide relevant software in MS-Excel™-VBA workbook format (ready to be used on any PC with MS-Office™ installed) to support these services, so we can hit the ground running without requiring expensive software to be provided.

*We are also engaged in providing college-level education, a form of "giving back" to society by helping people who were unable to complete an education earlier in life:*
